**INFORMATION**

TexFix® is the abbreviation of Textil Fixing, our range of textile graphics exhibition applied on aluminum profiles. A system where innovation and high quality go hand in hand. The process of creating TexFix® is as simple as it is easy to apply: around the entire edge of the textile graphic a fine silicone cord is sewn and then inserted into the rail of the aluminum profile. Its versatility, simplicity of application and high visual impact (with the possibility of incorporating an LED system), makes it currently one of the most demanded and effective communication solutions in the market: store decoration, shop windows, offices, exhibitions, waiting rooms, as in the creation of stands, furniture, promotional totems or exhibitors.

INFORMATION

When the TexFix® exceeds 2m on one of its sides, it is necessary to use the Central Reinforcement to ensure the stability of its structure. Made of aluminum and its assembly is very simple, you just have to make two holes of 14mm diameter at a distance of 45mm at its ends. In this way, the Locks are introduced at both ends and next to the reinforcement they are connected to the TexFix® profiles.
